

Frequently Asked Questions – Lamp Posts

What is your Guarantee Policy?

Mayne Lamp Posts come with a 15 year warranty that covers any defects in materials and workmanship.

What are Mayne Lamp Posts made of?

Our lamp posts are roto-molded using high quality polyethylene. The resin includes built in UV inhibitors offering long lasting protection from the elements (products won't yellow or discolor).

How do I Maintain my Lamp Post?

An occasional spray with a garden hose or power washer is recommended. To clean the product for best results use soap solution and high-pressure water.

What is Included with a Mayne Lamp Post?

Included is a 6 foot decorative post designed for retro-fit installations over an existing 3 inch diameter post. An optional aluminum ground mount conduit can also be purchased with our lamp posts for a new installation. The aluminum conduit measures 3 inches in diameter by 89 inches long and accommodates most residential post lamps. Detailed installation instructions are also included.

What Materials aren't Included with Mayne Lamp Posts?

Light fixtures and wiring materials are NOT included with our lamp posts. The recommended gravel and concrete required for a secure new installation are also not included.

How Difficult will my Lamp Post be to Install?

The length of time needed to install your lamp post will vary depending on whether you are using an existing post or completing a new installation and whether you are installing a hard-wired or solar lamp. All lamp posts come with detailed installation instructions and technical support is available by calling our toll-free number (866-363-8834) Monday to Friday from 8am-5pm EST. Please refer to local codes before installing outdoor lighting. UF-rated cable should be used for underground wiring and all materials should be approved by the Underwriter's Laboratory (UL). For recommendations regarding installation of outdoor lighting, please consult your local electrician.

Can I Paint a Mayne Lamp Post?

While there are paints available for vinyl products nothing has been made specifically for polyethylene. We don't recommend painting your Mayne Lamp Post and choosing to do so is done at your own discretion and will void your warranty.

Can an Address Plaque be hung from a Mayne Lamp Post?

The bracket provided with our Woodhaven Address Sign can be purchased separately and can also be attached to our Liberty Lamp Post; unfortunately this option is not available for the Signature Lamp Post as the inset panel on this post is too narrow for the bracket to attach correctly. In order to attach the bracket securely to the lamp post, metal tapping screws must be used (instead of the wood screws provided) so that a good connection is made with the aluminum mount inside of the decorative sleeve.
